SCREEN-READING SOFTWARE

INSTA READER APP:

Adichunchanagiri university has taken a significant step towards inclusivity and accessibility by providing a valuable tool to support our partially blind students. University has introduced an "Insta Reader app". This innovative application enables visually impaired students to access and read course materials, textbooks, PDF,TXT,DOCX,EXCEL, PPT and Web pages and other written content more effectively. It converts them to audio book and will read it out. It uses advanced text-to-speech technology, making it easier for them to engage with their studies and access information independently. Insta Reader supports documents across 60 + languages. Students can edit, copy, download, share the audio books, can take notes while reading, bookmark, search for text, track your reading time, skip unwanted text, set reading mode, adjust audio speed, pitch and change audio voice.

Outlook Assisted Vision App: This is a valuable resource for individuals with visual impairments, enhancing their productivity and accessibility by providing text-to-speech capabilities, voice commands, and integration with email, calendar, and task management features. This app contributes to a more inclusive digital environment, empowering users to navigate and manage their digital lives with greater independence.
