Message from
Hon'ble Chancellor

Jagadguru Sri Sri Sri
Dr. Nirmalanandanatha Mahaswamiji

Education in a University is the seat of learning where future leaders are produced. University plays a vital role in the development of the nation and the world at large. The basic object of higher education is for Self-reliance, investment for Future development and Catalyst for Socio-economic change in the Society.

Man feels proud that he has mastered many branches of knowledge and studied a number of texts. But he does not try to understand the essence of education. Nowadays, learning is limited only to physical and worldly aspects and moral, ethical, spiritual aspects are left out. Furthermore, some say knowledge is the most valuable acquisition, but character is more valuable than knowledge. Sacrifice, love, compassion and forbearance are the sterling human qualities that one should foster. Our University is striving hard to inculcate the high standards of conduct, behavior and the integrity of the personality in the individuals.

It is important that the higher education system increases its relevance to the society in which it functions. One of the major goals of the university education system is to multiply the knowledge, skills and various aspects of human potential in the country. We wish that the university realizes its inherent potential for the constructive purposes in the nation building process. Multiplication of skillsets though excellent education contributes to producing excellence in research, teaching and application.
