 - a) Will reject a proposal for award if it determines the tenderer recommended for award has engaged in corrupt or fraudulent practices in competing for the contract in question;
 - b) Will declare a firm ineligible, either indefinitely or for the stated period of time, to be awarded a university contract if it any time determines that the firm has engaged in corrupt or fraudulent practices in competing for, or in executing, a trust contract.
- 10) **Process to be confidential:** Information relating to the examination, clarification, evaluation, and comparison of tenders and recommendations for the award of contract will not be disclosed to tenderers or any other persons not officially concerned with such process until the award to the successful tenderer has been announced. Any effort by a tenderer to influence the employer's processing of tenders or award decisions may result in rejection of his tender.
- 11) **Clarification of Tenders:** To assist in the examination, evaluation, and comparison of tenders the employer may, at his discretion, ask and tenderer for clarification of his tender, including breakdowns of unit rates. The request for clarification and the response shall be writing or by cable, but no change in the price or substance of the tender shall be sought, offered, or permitted except

as required to confirm the correction of arithmetic errors discovered by the employers in the evaluation of the tenders.

- 12) **Delivery:** The successful BIDDER should commence the service as per the tender document/work or purchase order. For any queries or assistance, please write to clpthead@bgscet.ac.in or telephone to +91- 8123707324.
- 13) **Penalty Clause:** Non-execution of supply order – for the reasons of failure to supply partially or completely within the stipulated time or any event of breach of contract. In case at any following stages
- a) For the delayed supply (3 days of grace period) – 5% deduction
 - b) Quantity issues – 5 % deduction
 - c) Quality issues – 10% deduction.

Scope of Work

1.0 Materials (Pipelines & Accessories)

1.1 All pipelines shall be solid drawn, seamless, deoxidized, non-arsenic copper tubes, half-hard, tempered, and degreased, conforming to EN 13348 (Cu-DHP) standards for medical gas applications.

1.2 All fittings shall be manufactured from copper and designed for a working pressure of 4.2 bar, specifically intended for brazed socket-type connections. All joints shall be brazed using high-quality brazing alloys.

1.3 Shut-off valves suitable for respective pipe diameters shall be non-lubricated, quarter-turn (90°) lever-operated ball valves with PTFE seats. Valves shall have threaded ends with brass adaptors for copper pipes. All valves shall be pneumatically tested at 1.5 times the working pressure and degreased prior to supply for medical gas service.

2.0 Installation

2.1 Installation of pipelines shall be carried out under stringent cleanliness conditions. Only degreased pipes, fittings, and valves supplied in sealed polythene packaging shall be used at site.

2.2 Pipe supports and clamps shall be non-ferrous or made from non-deteriorating plastic, suitable for the respective pipe diameters.

2.3 All joints shall be executed using the latest recommended brazing techniques.

2.4 Pipelines shall be installed without springing or forcing and shall be adequately protected against mechanical damage to the satisfaction of the client.

3.0 Testing & Commissioning

3.1 All testing and commissioning procedures shall be carried out as per applicable standards, including but not limited to:

- Pressure testing of pipelines for leakage
- Valve tightness testing and verification of valve zoning
- Relief valve operational testing
- Pressure testing of the complete installation
- Mechanical operation and non-interchangeability testing of all terminal units using test probes.
- Cross-connection (anti-confusion) testing prior to patient use
- Pressure verification at all terminal units
- Functional testing of manifold changeover valves
- Operational testing of manifolds, vacuum pumps, air compressors
- Performance testing of alarm and monitoring systems
- Purging of the completed installation with the respective working gases

3.2 All testing shall be carried out under our supervision prior to handover.

4.0 Painting & Identification.

4.1 All exposed pipelines shall be painted with color-coded in accordance with IS 2379:2024 / ISO(NABH) as per the customer requirements.

4.2 Concealed pipelines shall be provided with gas identification bands/labels at appropriate intervals. Pipelines embedded within walls shall be tested, painted, and labelled prior to concealment. (Concealing of Pipes in to the wall are not recommended).

5.0 Certification

5.1 We certify that all pipelines are suitable for their intended medical gas services and that complete cross-connection testing shall be carried out before system handover.
